

AG Mortgage Investment Trust, Inc.

October 2012

NYSE: MITT

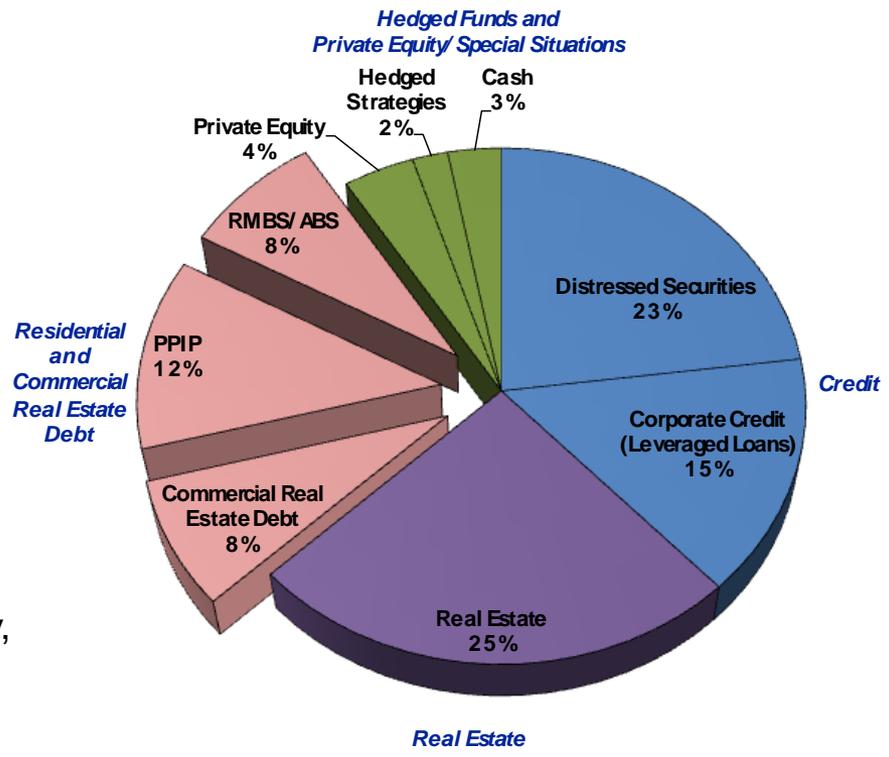

This presentation includes "forward-looking statements" within the meaning of the safe harbor provisions of the United States Private Securities Litigation Reform Act of 1995. Forward-looking statements are based on estimates, projections, beliefs and assumptions of management of the Company at the time of such statements and are not guarantees of future performance. Forward-looking statements involve risks and uncertainties in predicting future results and conditions. Actual results could differ materially from those projected in these forward-looking statements due to a variety of factors, including, without limitation, changes in interest rates, changes in the yield curve, changes in prepayment rates, the availability and terms of financing, changes in the market value of our assets, general economic conditions, market conditions, conditions in the market for agency securities, and legislative and regulatory changes that could adversely affect the business of the Company. Additional information concerning these and other risk factors are contained in the Company's most recent filings with the Securities and Exchange Commission ("SEC"). Copies are available on the SEC's website, <http://www.sec.gov/>. The Company does not undertake or accept any obligation or undertaking to release publicly any updates or revisions to any forward-looking statements to reflect any change in its expectations or any change in events, conditions or circumstances on which any such statement is based.

A Premier Alternative Investment Manager with Extensive RMBS, ABS and Real Estate Investment Experience

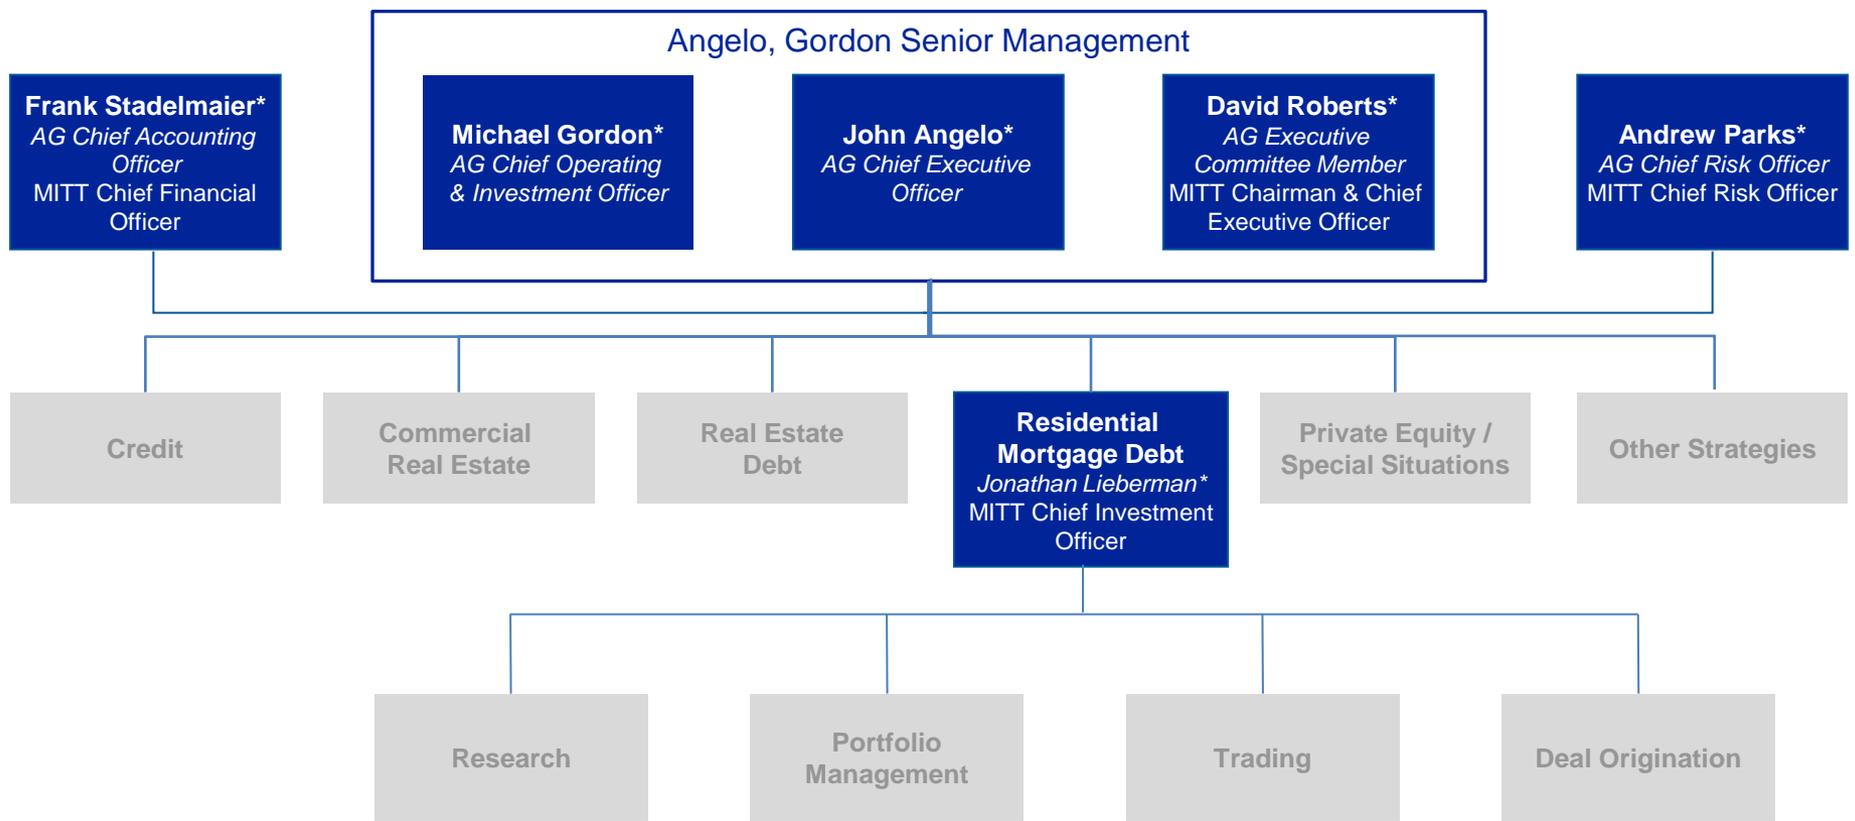

- Founded in 1988, 100% employee-owned
- \$13.2 billion in structured products, including \$10.7 billion in RMBS and CMBS(*)
- Over 270 employees with more than 90 seasoned investment professionals
 - Over 50 investment professionals dedicated to RMBS, CMBS and commercial real estate
- Headquartered in New York with offices globally
- Established and comprehensive infrastructure including Risk Management, Information Technology, Accounting and Trade Support

Total AUM: \$24 billion

Note: Approximate, as of June 30, 2012 (*) Structured products figures reflect long market value, taking leverage into account, where applicable.

- Supported by access and insight from the broader Angelo, Gordon platform

* Indicates member of Investment Committee of AG Mortgage Investment Trust. Titles at AG REIT Management, LLC: David Roberts – Chief Executive Officer; Jonathan Lieberman – Chief Investment Officer; Frank Stadelmaier – Chief Financial Officer; Andrew Parks – Chief Risk Officer.

- Emphasis on constructing a portfolio reflective of our view of the macro-economy and the current investment landscape
- Integration of market perspectives with rigorous loan level analysis, including utilization of current credit bureau borrower information where applicable
- Hybrid structure allows us to benefit from the breadth and expertise of Angelo, Gordon's CMBS, RMBS and ABS platforms, including our network of real estate operating partners across the country
 - Tactical allocation into credit based upon opportunity set with consideration to duration, liquidity and return profiles across sectors
 - Seventeen dedicated investment professionals in RMBS/ABS/CMBS in the market on a daily basis evaluating all available investment opportunities
- Potential market opportunities stemming from:
 - The housing finance market continues to be in a period of transition with private investors likely to play a larger role as the government seeks to diminish its role in the mortgage market
 - Domestic banks adapting to ever-changing regulatory environment
 - Mandated decline in GSE retained portfolios of 15% per year

AG Mortgage Investment Trust, Inc. is an actively managed REIT that opportunistically invests in a diversified risk-adjusted portfolio of Agency RMBS, Non-Agency RMBS, CMBS and ABS

- **\$2.85 per share of net income**
 - Net realized gains of \$7.6 million, or \$0.48 per share
- **\$0.86 per share of Core Earnings¹**
 - Increased from \$0.71 per share in Q1 2012
- **\$21.78 net book value per share² as of June 30, 2012**
 - Increased \$2.15 per share from \$19.63 per share as of March 31, 2012
 - Including impact of \$0.70 per share dividend declared for the quarter ended June 30, 2012 and paid on July 27, 2012
- **Approximately \$1.17 per share² of undistributed taxable income as of June 30, 2012**
- **20.0% return to investors who participated in the Initial Public Offering⁸**
- **27.6% annualized return on stock**
- **14.5% return on equity during the quarter⁹**

- **\$2.7 billion investment portfolio as of June 30, 2012^{3,7}**
 - 83.6% Agency RMBS
 - 16.4% credit securities (Non-Agency RMBS, ABS, CMBS)

- **5.5% constant prepayment rate (“CPR”)⁴ on the Agency RMBS portfolio for the second quarter**
 - 5.1% CPR for the month of June, 2012
 - 5.0% CPR year-to-date

- **6.79x leverage as of June 30, 2012^{5,7}**

- **2.55% net interest margin as of June 30, 2012⁶**

Portfolio construction and asset allocation based upon risk-adjusted returns, liquidity considerations, market-to-market volatility and our current global economic outlook. Implementation of QE3 by the Fed in September reflective of the lackluster state of the U.S. economy:

- Macro-economic environment continues to be challenging
 - Tepid growth in the U.S.
 - Heavy U.S. household debt burden and growing government deficit
 - Core European countries experiencing a double dip recession and European periphery experiencing a depression
 - Emerging economies experiencing slowing growth, depreciating currencies and reducing interest rates
- U.S. unemployment stubbornly high and unlikely to meaningfully decline near-term
- Looming fiscal cliff in the U.S.
- U.S. housing and commercial real estate
 - Stronger signs of a recovery in housing though not uniform across or within geographies
 - Sustained low mortgage rates helping to cement a floor for home prices
 - Recovery of Class A properties continues, Class B&C properties and secondary markets experiencing slower recovery
- Short-term interest rates in the U.S. will remain low through at least 2015

Interest rates and Structured Products have rallied into the second half of the year

MITT's Agency RMBS investment portfolio is constructed to limit prepayment risk while considering duration targets

- The MITT portfolio is comprised of prepayment protected pools and new production securities
 - 70% of specified pools backed by prepayment protected collateral - lower maximum loan balances, higher LTV and concentrations in slower prepaying geographic regions
 - Balance of the collateral is primarily new origination with a weighted average loan age of five months
 - Sold select 15-year securities where pay-ups had appreciated meaningfully
 - Increased allocation to 30-year securities
 - Focus on lower coupons to further minimize risk of prepayments

Percentages represent % of total agency specified pools as of 6/30/2012
30yr Other includes GEO, LTV and HARP pools

- Interest-Only Securities
 - Inverse interest-only (IIO) securities offer attractive current yield and valuations given the interest rate environment
 - Investment consistent with approach to specified pools with a focus on prepayment protected IIO

- CPRs on the portfolio were muted for the 2nd Quarter
 - 5.5% CPR for Q2 2012
 - 5.1 % CPR for June 2012

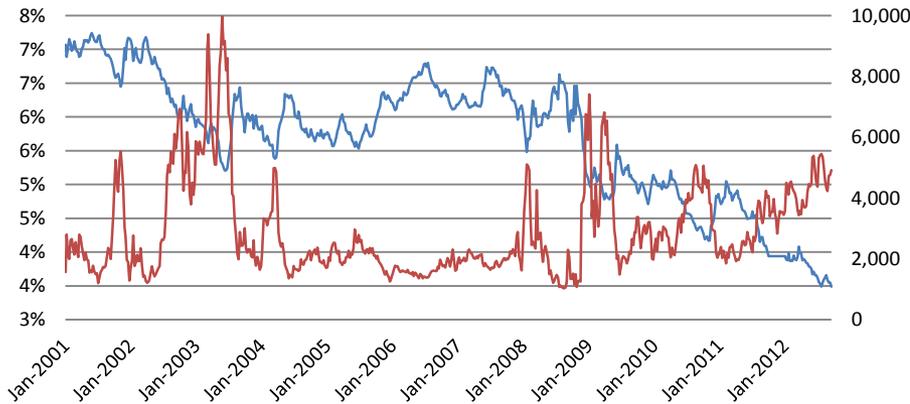

Description	Current Face (mm)	Fair Value (mm)	Coupon	Yields	Cost of Funds	NIM
Agency RMBS						
15-year fixed rate	\$718.4	\$761.4	3.2%	2.4%	0.9%	1.5%
20-year fixed rate	267.0	283.1	3.6%	2.7%	0.9%	1.8%

Total Agency RMBS	\$2,516.5	\$2,249.9	4.0%	3.0%	0.9%	2.1%

Prepayment Themes and QE3

Prepayment risk remains elevated into year-end as mortgage rates continue their decline to new historic lows in the wake of QE3

- Interest rates expected to remain “exceptionally low” through at least 2015 with the Fed committed to supporting the housing market through low mortgage rates
 - With QE 3 Fed expected to be buying 50-75% of gross issuance (\$40 billion per month in addition to existing reinvestment of paydowns) mortgage rates firmly anchored at low levels
 - Elevated CPRs likely for portions of the Agency RMBS universe with over 95% of 30 year borrowers at least 50bps in the money though CPRs will vary widely within the sector based on underlying loan characteristics
- While HARP 2.0 speeds have likely peaked policy risk is still an investment consideration with several bills still to be considered by Congress

30-Year Mortgage Rate vs. Refinancing Index

Source: Credit Suisse Locus

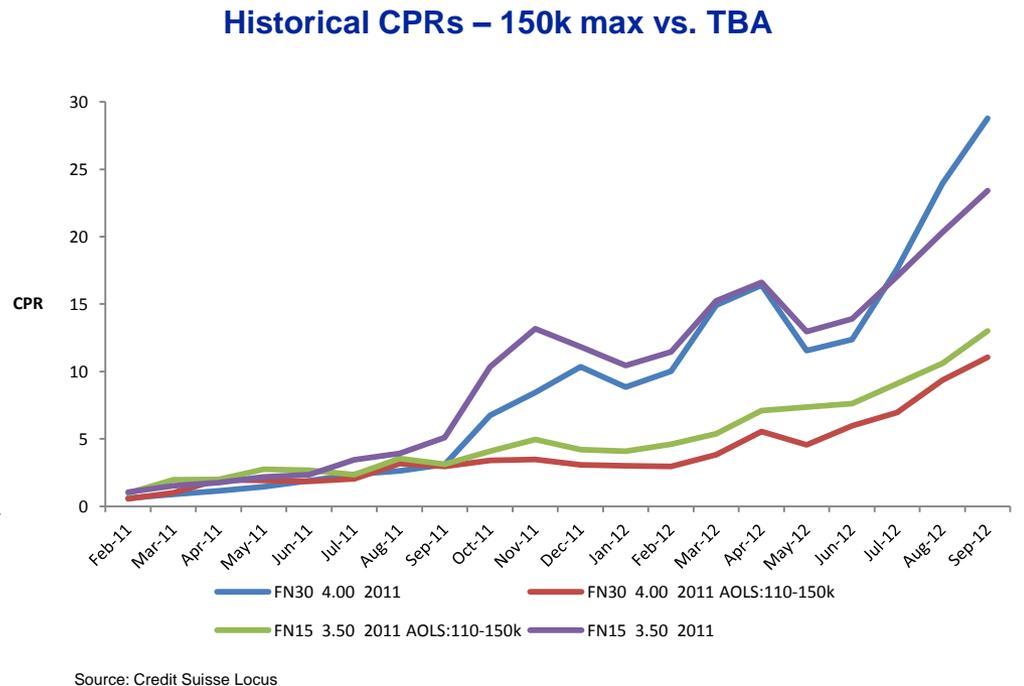

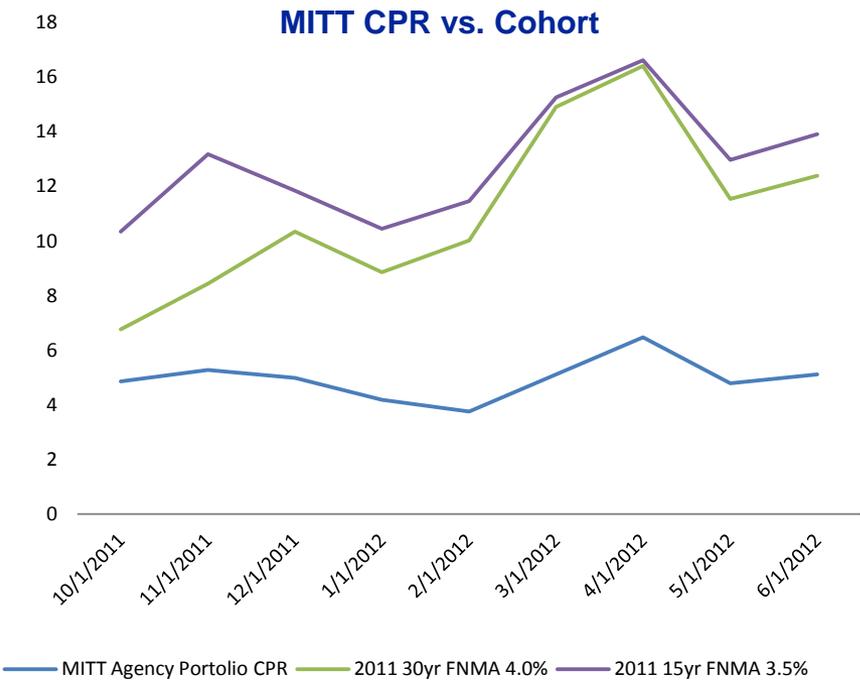

The Fed has purchased \$343 billion through 9/26/2012, including \$20.1 billion from 9/20/12-9/26/12

Maturity	Coupon	FHLMC	FNMA	GNMA	GNMA2	TOTAL
30 year	3.0	14,250	34,750	2,400	7,200	58,600

Total		99,100	190,350	14,150	39,650	343,250

Source: Federal Reserve

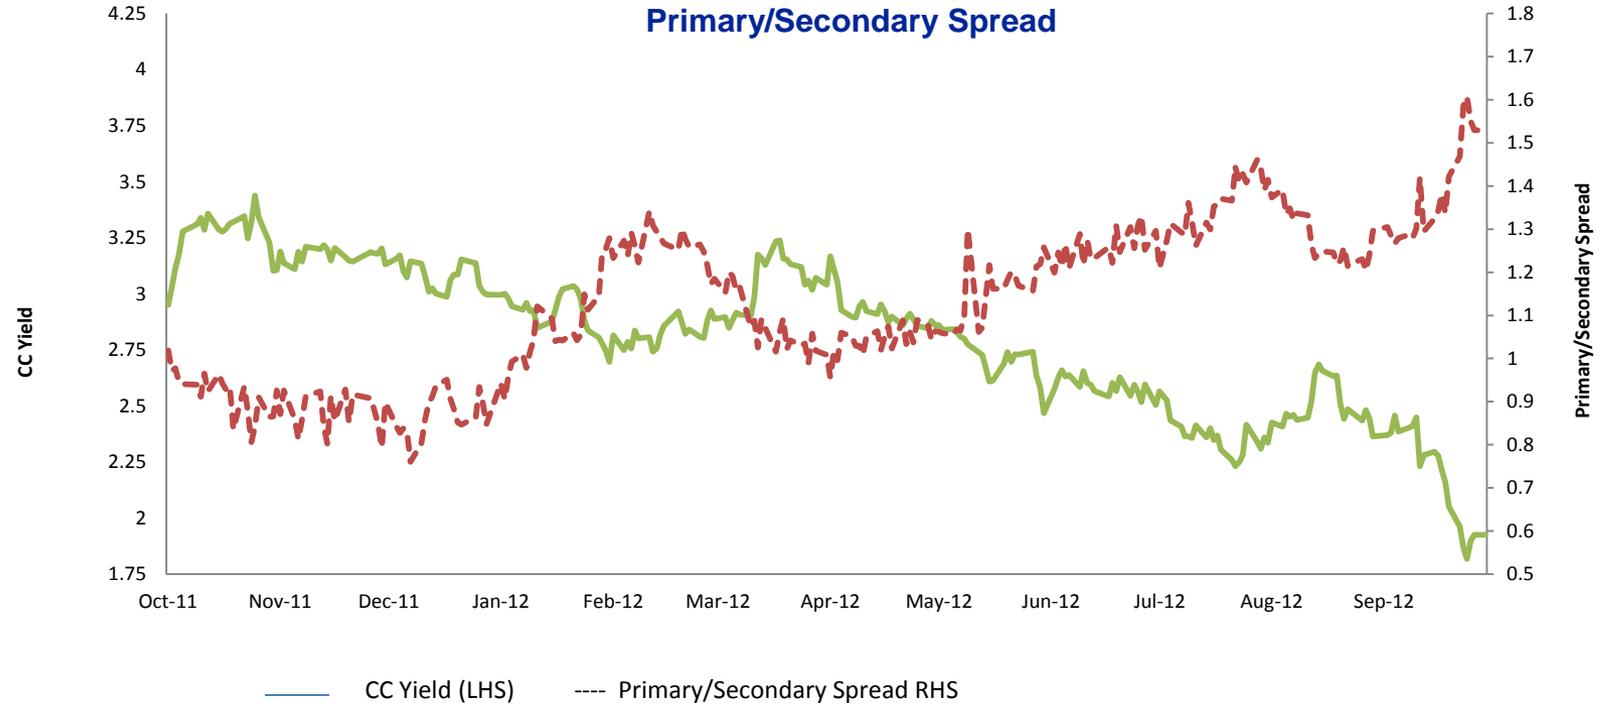

MITT's Agency portfolio constructed based on the view that rates would remain low and further Fed stimulus was possible given the lackluster state of the economy

- Despite sustained record low mortgage rates, certain collateral characteristics have continued to prepay significantly slower than the cohort, including loans with maximum balances under \$150,000 as well as new origination loans
- In addition to loan balance, less seasoned loans prepay at much lower CPRs

Despite low rates other factors may hamper a more meaningful increase in prepayments

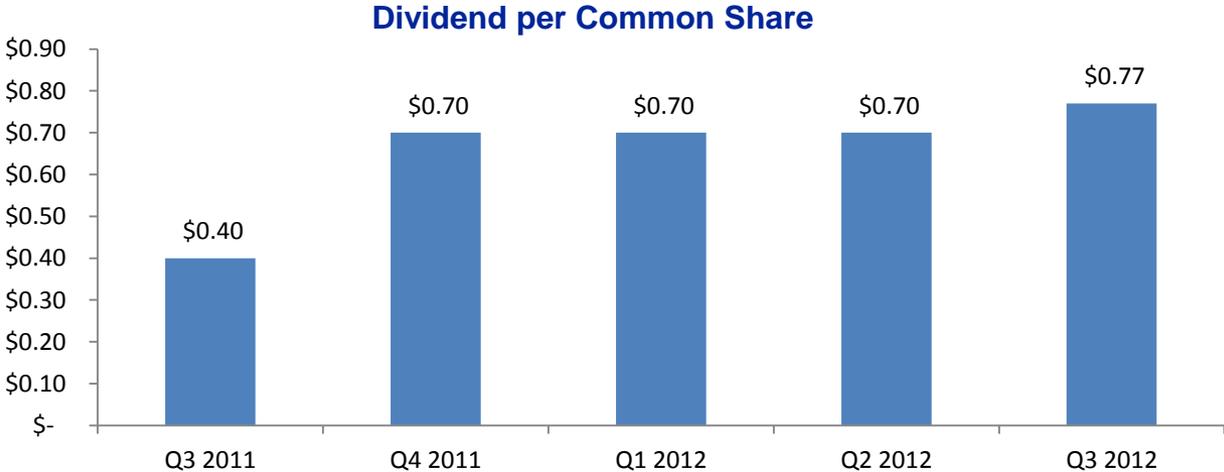

- Capacity constraints still visible in the mortgage origination and servicing channel as evidenced by the primary/secondary spread
- Recent 10bps g-fee increases with further increases likely in certain geographies and other potential increases down the road
- Servicers likely to continue to focus on HARP eligible borrowers

Over the third quarter the Company completed several capital raises:

- Completed a follow-on offering of 6,900,000 shares of Common Stock for estimated gross proceeds of \$160 million
- Completed two preferred stock offerings during the quarter:
 - 2,070,000 shares of 8.25% Series A Cumulative Redeemable Preferred Stock for estimated gross proceeds of \$52 million
 - 4,600,000 shares of 8.00% Series B Cumulative Redeemable Preferred Stock for estimated gross proceeds of \$115 million
- Filed a Prospectus Supplement dated September 6, 2012 registering up to 3,000,000 Shares of Common Stock to be sold via an “at the market” program

On September 6 announced a third quarter dividend of \$0.77 per share, representing a 10% increase versus the second quarter

Increased investments in credit securities during the quarter to 16.4%

Non-Agency RMBS

- Increased holdings of non-agency RMBS by over 65%
- Focus on senior prime securities with high current yield as well as stable yield profiles across various housing stress scenarios
- Continued to increase allocation to senior short duration securities

Asset-backed securities (ABS)

- Attractive yields given relatively short duration and strong fundamentals
- Monetized gains on select ABS securities and deployed the proceeds in higher yielding credit assets
- Liquid asset class providing for stable market value

Commercial mortgage-backed securities (CMBS)

- Opportunities exist in both new issue and legacy CMBS securities
- Leverage the expertise of dedicated Angelo, Gordon CMBS and Real Estate teams

Sector	Current Face (mm)	Fair Value (mm)	Yields	Cost of Funds	NIM
Non-Agency RMBS:					
Senior Prime Fixed	\$174.8	\$157.9	6.1%	1.8%	4.3%
Senior Prime Hybrid	49.9	41.4	5.6%	2.0%	3.6%
Senior Short Duration	81.4	82.0	5.4%	1.1%	4.3%
Other	113.8	90.4	8.0%	1.9%	6.1%
Total Non-Agency RMBS	\$419.9	\$371.7	6.3%	1.7%	4.6%
Other Credit Assets:					
ABS	\$13.5	\$13.5	6.6%	1.5%	5.1%
CMBS	\$57.6	\$55.3	6.9%	1.7%	5.2%
Totals Credit Assets	\$491.0	\$440.5	6.4%	1.7%	4.7%

Portfolio leverage of 6.79x as of June 30, 2012

- During the quarter, leverage decreased from 7.12x as of March 31, 2012 due to an increase in the allocation to credit securities
- Leverage is currently within our targeted range while leaving excess capacity to take advantage of opportunities in both the agency and credit markets

Asset Class	Leverage ⁽¹⁰⁾
Agency RMBS	7.4x ⁽¹¹⁾
Non-Agency RMBS	5.0x
CMBS	3.5x
ABS	3.0x

We maintained liquidity in excess of \$156 million as of June 30, 2012⁽¹²⁾

- Liquidity is more than sufficient to offset risks including higher haircuts, higher prepayments and decrease in market values
- If haircuts on Agency MBS increased from approximately 5% to 8%, liquidity of \$63.0 million would be needed to meet margin calls (i.e., 1% change is equal to \$21.0 million)
- If our Agency portfolio paid at a CPR equal to 5 times the June 2012 portfolio prepayment speed (5.1 CPR), liquidity of \$49.1 million would be required to meet any interim margin calls between factor date and payment date
- If the market value of the portfolio decreased by 1% across all assets, liquidity of \$25.5 million would be required to meet margin calls

Repurchase Agreements (“repo”) with 26 financial institutions

- Targeted counterparty exposure risk less than 10%
- Maximum exposure to any one counterparty was 9% at quarter end with the average being less than 5%
- Haircuts remained relatively unchanged during the quarter
- 0.63% weighted average repo cost of funds
 - The increase in repo cost of funds from Q1 2012 is primarily attributable to the increased allocation to Non-Agency RMBS and CMBS securities
 - Repo rates for agency securities increased slightly during the quarter

MITT Repos				
<i>(\$ in thousands – as of June 30, 2012)</i>				
Original Repo Maturities	Repo Outstanding	WA Interest Rate	WA Days to Maturity	% Repo Outstanding
30 Days or less	\$1,981,863	0.63%	16.1	84.1%
31-60 Days	192,398	0.46%	48.4	8.2%
61-90 Days	11,846	0.92%	69.8	0.5%
Greater than 90 Days	169,132	0.80%	270.4	7.2%
Total and WA	\$2,355,239	0.63%	37.3	100.0%

Hedging policy will not eliminate interest rate risk and market value risk. Rather, we seek to protect net interest margin and book value within a specified band of risk based upon our rates outlook. Hedges will be adjusted to respond to different interest rate expectations.

Interest rate swaps

- Standard interest rate swaps
- 50% of total repo notional hedged¹³
- Hedge ratio target range of 40% to 60% subject to current interest rate environment
- Interest rate swaps hedge debt and affect our NIM

Mortgage derivative hedges

- Efficient hedge due to positive carry with negative duration
- Seasoning and low loan balance provide call protection in a low rate environment
- MBS derivatives primarily function as a market value hedge as compared to swaps

Interest Rate Swaps (as of June 30, 2012)				
Maturity	Notional Amount	Weighted Average Pay Rate	Weighted Average Receive Rate	Weighted Average Years to Maturity
2013	\$42,000,000	0.56%	0.24%	1.07
2014	204,500,000	1.00%	0.45%	2.04
2015	334,025,000	1.13%	0.49%	2.88
2016	307,500,000	1.16%	0.43%	3.77
2017	60,000,000	1.18%	0.53%	4.61
2018	120,000,000	1.61%	0.48%	5.89
2019	115,000,000	1.75%	0.47%	6.78
2022	20,000,000	0.47%	1.75%	9.97
Total / Wtd Avg	\$1,203,025,000	1.19%	0.48%	3.78

Duration gap of the portfolio was approximately 1.3 years as of June 30, 2012

- Duration gap is a measure of the difference in the interest rate sensitivity of our assets and our liabilities
- Hedges include impact of both interest rate swaps and MBS derivatives

<u>Duration</u>	<u>Years</u>
Assets	3.0
Hedges	-1.6
Repurchase Agreements	-0.1
Duration Gap	1.3

Interest Sensitivity Table

Change in Interest Rates (bps)	-100	-75	-50	-25	Base	25	50	75	100
Change in Market Value (\$ in Millions)	(\$7.7)	\$3.9	\$11.0	\$8.1	\$0.0	(\$11.7)	(\$26.4)	(\$43.6)	(\$62.8)
Change in Market Value as a % of Assets	-0.3%	0.1%	0.4%	0.3%	0.00%	-0.4%	-1.0%	-1.6%	-2.3%

% Change in Projected Net Interest Income	6.0%	6.0%	5.8%	3.9%	0.00%	-3.9%	-7.8%	-11.8%	-15.7%

- The interest rate sensitivity table above shows the estimated impact of an immediate parallel shift in the yield curve up and down 25, 50, 75 and 100 basis points on the market value of the portfolio as of June 30, 2012

- \$44.9 million of net income, or \$2.85 per share, fully diluted
 - GAAP net income includes mark-to-market adjustments on our investment portfolio and our hedges
 - Net realized gains of \$7.6 million, or \$0.48 per share
- \$13.5 million of Core Earnings¹, or \$0.86 per share, fully diluted
 - Core Earnings equals GAAP net income excluding realized and unrealized gains on investments and derivatives
- \$0.70 per share dividend declared for the second quarter
- Approximately \$1.17 per share² of undistributed taxable income as of June 30, 2012
- 2.55% net interest margin⁶ as of June 30, 2012
- 20.0% return to investors who participated in the Initial Public Offering
- 14.5% return on equity during the quarter

Operating Metrics ⁷	Weighted Average at June 30, 2012	Weighted Average for the Quarter Ended June 30, 2012
Investment portfolio ³	\$2,690,440,528	\$2,561,561,211
Repurchase agreements	\$2,355,239,040	\$2,272,295,879
Stockholders' equity	\$344,202,616	\$329,475,936
Leverage ratio ⁵	6.79x	6.90x
Swap ratio ¹³	50%	52%
Yield on investment portfolio ¹⁴	3.54%	3.31%
Cost of funds ¹⁵	0.99%	0.95%
Net interest margin ⁶	2.55%	2.36%
Management fees ¹⁶	1.39%	1.45%
Other operating expenses ¹⁷	0.88%	0.92%

- 1 Core Earnings is defined as net income excluding both realized and unrealized gains (losses) on the sale or termination of securities, including those underlying linked transactions and derivatives.
- 2 Per share figures are calculated using outstanding shares including all shares granted to our Manager and our independent directors under our equity incentive plans as of quarter end.
- 3 The total investment portfolio is calculated by summing the fair market value of our Agency RMBS, Non-Agency RMBS, CMBS and ABS assets, including linked transactions. The percentage of Agency RMBS and credit investments are calculated by dividing the respective fair market value of each, including linked transactions, by the total investment portfolio.
- 4 Represents the weighted average monthly CPRs published during the period for our in-place portfolio during the same period.
- 5 The leverage ratio during the quarter was calculated by dividing our daily weighted average repurchase agreements, including those included in linked transactions, for the period by the weighted average stockholders' equity for the period. The leverage ratio at quarter end is calculated by dividing total repurchase agreements, including those included in linked transactions, plus the net payable/receivable on unsettled trades on our GAAP balance sheet by our GAAP stockholders' equity.
- 6 Net interest margin is calculated by subtracting the weighted average cost of funds from the weighted average yield for the Company's investment portfolio, which excludes cash held by the Company.
- 7 Generally when we purchase a security and finance it with a repurchase agreement, the security is included in our assets and the repurchase agreement is separately reflected in our liabilities on our balance sheet. For securities with certain characteristics (including those which are not readily obtainable in the market place) that are purchased and then simultaneously sold back to the seller under a repurchase agreement, US GAAP requires these transactions be netted together and recorded as a forward purchase commitment. Throughout this presentation where we disclose our investment portfolio and the repurchase agreements that finance them, including our leverage metrics, we have un-linked the transaction and used the gross presentation as used for all other securities. This presentation is consistent with how the Company's management evaluates the business, and believes provides the most accurate depiction of the Company's investment portfolio and financial condition.
- 8 Return to investors is calculated by taking the change in investment value divided by original cost. Original cost is equal to the Initial Public Offering price ("IPO price") or Follow-On price ("FO price") and the change in investment value is equal to the change from our IPO or FO price to the closing price on the last business day of the current quarter plus dividends declared
- 9 Return on equity during the quarter is calculated by dividing net income at quarter end by stockholders' equity at the beginning of the quarter.
- 10 Leverage includes the effects of unsettled trades and linked transactions for the periods presented.

- 11 Unpledged cash included as an asset for Agency RMBS.
- 12 Liquidity is defined as unpledged cash, unpledged Agency RMBS and unpledged credit securities.
- 13 The swap ratio during the quarter was calculated by dividing our daily weighted average swap notionals, excluding forward starting swaps and including receive fixed swap notionals as negative values, for the period by our daily weighted average repurchase agreements, including those included in linked transactions. The swap ratio at quarter end was calculated by dividing the notional value of our interest rate swaps by total repurchase agreements, including those included in linked transactions, plus the net payable/receivable on unsettled trades.
- 14 The yield on our investment portfolio represents an effective interest rate, which utilizes all estimates of future cash flows and adjusts for actual prepayment and cash flow activity as of quarter end. The yield on our investment portfolio during the quarter was calculated by annualizing interest income for the quarter and dividing by our daily weighted average securities held. This calculation excludes cash held by the Company.
- 15 The cost of funds during the quarter was calculated by annualizing the sum of our interest expense and our net pay rate of our interest rate swaps, and dividing by our daily weighted average repurchase agreements for the period. The cost of funds at quarter end was calculated as the sum of the weighted average rate on the repurchase agreements outstanding at period end and the weighted average net pay rate on our interest rate swaps. Both elements of the cost of funds were weighted by the repurchase agreements outstanding at quarter end.
- 16 The management fee percentage during the quarter was calculated by annualizing the management fees incurred during the quarter and dividing by our weighted average stockholders' equity for the quarter. The management fee percentage at quarter end was calculated by annualizing management fees incurred during the quarter and dividing by quarter-ended stockholders' equity.
- 17 The other operating expenses percentage during the quarter was calculated by annualizing the other operating expenses incurred during the quarter and dividing by our weighted average stockholders' equity for the quarter. The other operating expenses percentage at quarter end was calculated by annualizing other operating expenses recorded during the quarter and dividing by quarter-ended stockholders' equity.
